

# POSTSAVER

Double Life Fence Posts... Double Life Fencing...

## Pro-Mill Sleeve Application Machine

- Capacity up to 450 posts per hour for posts sizes 100mm (4") and below
- Capacity up to 225 posts per hour for post sizes over 100mm (4")
- Post size range 75mm (3") to 200mm (8")
- Press unit available for square posts

### Pro-Mill Machine Specification

---

<b>Post size range:</b>	75mm to 200mm round square or rectangular
<b>Post length range:</b>	1650mm (5'6") to 3m (10')*
<b>Throughput:</b>	up to 450 poles or post per hour
<b>Machine size floor area:</b>	approx 3.0m x 5.0m
<b>Machine weight approx:</b>	1000 kg
<b>Power requirement:</b>	3 phase 415v ac/28kw (depending on post size)
<b>Power consumption:</b>	28kw hour (at 8p/kwh = £1.52 – £2.24 per hour)
<b>Compressed air:</b>	6–7 bar (100 p.s.i.) (Automatic press unit only)

\*longer post lengths can be accommodated with the use of additional supports (not included)

### Installation - please note

---

The machines are supplied in 2 or more parts, some on site assembly is required. All machines to be installed on level hard standing in a dry and draught/wind free environment, use in very cold environments or with cold/damp posts can reduce throughput. For maximum throughput we recommend the use of scissor lift or support tables to support pallets of posts at height optimum for operator efficiency. Machine set up and use is straightforward and comprehensive instructions are supplied
